

Continuation-Tracker System (Krissy)

GoHighLevel Workflow Documentation

1. Overview

The Continuation-Tracker System is a set of four GoHighLevel workflows that manages a coaching client's journey after graduation: identifying completed clients, tracking continuation engagement, recording enrollments, and managing clients who decline continuation programs.

#	WORKFLOW	WHAT IT DOES
1	WF-CT1 Graduation Entry	Identifies clients who reach the end of their program, marks them as graduated, and creates a continuation opportunity
2	WF-CT2 Continuation Engagement	Tracks client engagement through clicks, replies, and appointments, then moves interested clients into the continuation pipeline
3	WF-CT3 Continuation Enrolled	Records continuation program purchases by creating opportunities with the correct program value
4	WF-CT4 Continuation Declined	Identifies graduated clients who did not enroll and creates a follow-up opportunity

Two engines run together

ENGINE	WORKFLOWS	PURPOSE
Graduation engine	WF-CT1	Identify completed clients, apply graduation status, begin continuation tracking
Continuation pipeline engine	WF-CT2, WF-CT3, WF-CT4	Track whether a graduated client shows interest, engages with offers, enrolls in another program, or declines all options

This system depends on the **Client Journey System**, which sets Program Start Date at Closed Won and applies the outreach sent tag when a continuation email goes out. That system has its own SOP.

2. System Overview

3. Fields, Pipeline and Tags

Fields and tags

NAME	TYPE	PURPOSE
Program Start Date	Date field	Tracks when the client started their program. Set by the Client Journey System.
existing client	Contact tag	Identifies active coaching clients
graduated	Contact tag	Marks clients who completed their program
outreach sent	Contact tag	Identifies clients who received continuation outreach. Applied by the Client Journey System.
continuation engaged	Contact tag	Tracks clients who interacted with continuation offers
Enrollment tags: enrolled-continuermm-3mo · enrolled-continuermm-6mo · enrolled-forge-1yr · enrolled-forge-6mo · enrolled-rfb-1yr · enrolled-rfb-6mo · enrolled-rmmplus	Contact tags	Identifies purchased continuation programs
declined-all	Contact tag	Marks clients who declined all continuation options

Pipeline

PIPELINE	STAGES
Continuation Program	Continuation Offer · Engaged · Enrolled · Declined

4. The Four Workflows

1 · WF-CT1 - Graduation Entry

PURPOSE	Automatically identifies clients who complete their coaching program, marks them as graduated, and moves them into the continuation program pipeline.
TRIGGER	Program Start Date is populated · 77 days have passed since Program Start Date · contact has the tag existing client
STEPS	1. Add tag "graduated" 2. Create or update opportunity: pipeline Continuation Program, stage Continuation Offer, name {{contact.name}}, status Open
OUTCOME	The client is officially moved from active coaching into the continuation journey.

2 · WF-CT2 - Continuation Engagement

PURPOSE	Tracks whether graduated clients engage with continuation offers through link clicks, appointment confirmations, or replies.
TRIGGER	Any of: clicks a tracked continuation link · appointment confirmed · customer replies
STEPS	Check: does the contact have the tag "outreach sent"? YES: add tag "continuation engaged", then create or update opportunity: pipeline Continuation Program, stage Engaged, name {{contact.name}} NO: no action. The workflow ends.
OUTCOME	Interested clients are visible in the Engaged stage. Contacts who never received outreach are ignored.

3 · WF-CT3 - Continuation Enrolled

PURPOSE	Records when a client purchases a continuation program and creates an opportunity with the correct program value.
TRIGGER	One of the seven enrollment tags is added (see Section 3)
STEPS	1. Identify the program from the tag 2. Create or update opportunity: pipeline Continuation Program, stage Enrolled, name {{contact.name}} 3. Assign the program value from the table below
OUTCOME	The purchase is recorded on the pipeline with its value.

Program values

PROGRAM	OPPORTUNITY VALUE
Continue RMM 3 Month	\$1,500
Continue RMM 6 Month	\$2,000
Forge 1 Year	\$8,500
Forge 6 Month	\$4,997
RFB 1 Year	\$8,500
RFB 6 Month	\$4,997
RMM Plus	\$2,997

4 · WF-CT4 - Continuation Declined

PURPOSE	Identifies graduated clients who have not enrolled into any continuation program after the decision period and creates a follow-up opportunity.
TRIGGER	Custom date field reaches 90+ days · contact has the tag graduated
STEPS	Check enrollment tags (Continue RMM, Forge, RFB, RMM Plus) Enrolled: stop. No action. Not enrolled: add tag "declined-all", then create or update opportunity: pipeline Continuation Program, stage Declined, name {{contact.name}}
OUTCOME	Clients who declined everything are visible in the Declined stage for a personal follow-up.

5. Overall Client Journey

6. Related System

The **Client Journey System (Krissy)** runs before this one. It sets Program Start Date at Closed Won, sends the continuation offers on days 28, 35 and 59, and applies the outreach sent tag that WF-CT2 checks. It is documented in its own SOP.

One item to reconcile between the two SOPs: the Client Journey emails add contacts to a pipeline called **Continuation Programs** (stages Outreach Sent, Needs Follow-Up), while this system uses **Continuation Program** (stages Continuation Offer, Engaged, Enrolled, Declined). Confirm in GoHighLevel whether these are one pipeline or two, and align the names so both systems write to the same board.
